

Canyon Manufacturing Services, Inc. Acquires New Equipment

Houston, TX August 1, 2012- Canyon Manufacturing is pleased to report they have added 4 new state-of-the-art machines to their production floor.

New Equipment:

- Canyon adds a new K.I.S.S.-104 Selective Solder machine to new automated line. We can now offer HMP & all lead free alloys as a selective solder value added service.
- Canyon acquires new Mydata MY100 LXe Pick & Place will place 01005 components and electrically verify a range of passive components “on-the-fly”.
- Canyon Adds new Heller 1707 MK III Lead Free N2 forced air convection reflow oven. For the least stressful, most reliable SMT soldering available for lead free assembly as well as conventional 63/37 alloy.
- ATE (Automated Test Equipment) for Canyon’s rotatable connectors will completely test all channels for dielectric resistance and continuity

About Canyon: Canyon provides PCB assembly solutions including state-of-the-art printed circuit board assembly and prototype assembly. Reliability begins with preparation. Proprietary processes developed over years of experience yield an assembly of uncompromising reliability.
